Instructions for Patterns - Sequencing

Patterns - Sequencing

1. If this is the first time playing, talk as a group and decided on the proper sequence to making a fossil fuel with the cards from the deck
2. Collect cards and shuffle, deal out 4 cards to each player
3. Person left of the dealer goes first. They **MUST** put down the first step of the process, if they don't have that card then they pick up from deck. If they pick up the card needed, they may play it.
4. The next player takes their turn. They **MUST** put down the next step of the sequence.
5. Play goes around from player to player until someone runs out of cards.

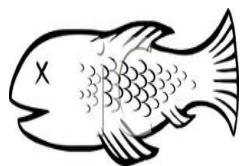

ORGANISM GETS ENERGY FROM THE SUN

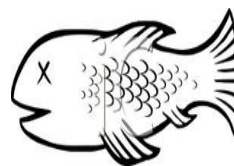

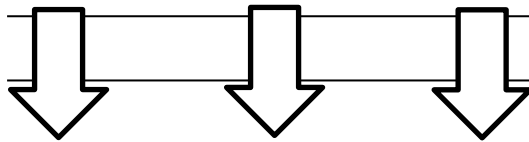

ORGANISM DIES

ORGANISM GETS BURIED IN SEDIMENT

HEAT AND PRESSURE ARE APPLIED TO THE REMAINS OF THE ORGANISM

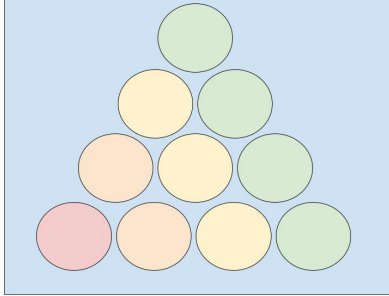

HEAT
