**Earth
Science**

**Earth
Science**

Weather

**I am the
current
condition of the
air outside.**

Climate

**I am the set of
weather
conditions over
a long period of
time: 30 years
or more.**

Data

**I am a piece of
information.**

Humidity

**I am the amount
of water vapor
in the air.**

Temperature

**I am a measure
of the amount of
heat energy in
an object or
system.**

Typical

**I am a word
and that means
common or
usually.**

Science**

Fresh Water

**I am the water found
in rivers, lakes,
glaciers, ice sheets,
and underground
that contains low
concentrations of
salt.**

Salt Water

I am the water found in oceans that contains 3-4% salt.

Ocean

I am the entire body of salt water that covers about 71% of the Earth.

Sun

I am the star at the center of the solar system that provides heat and light to Earth.

Water Cycle

I am the constant movement of water through the land, air, oceans, and living things.

Evaporation

I am the changing of water from liquid to a gas.

Condensation

I am a physical change in matter from a gas to a liquid.

Precipitation

**I am rain, snow,
sleet, or hail that
falls from clouds
in the sky.**

Runoff

**I am the
movement of
water on a surface
to areas of lower
elevation.**

End of Row

**Earth
Science**

Sun

**I am the star at the
center of our solar
system that supplies
heat and light to
Earth. Its enormous
gravity keeps the
solar system in orbit.**

Earth

**I am the planet
that all known
life exists on.**

Moon

**I am a natural
satellite that orbits
a planet.**

Axis

I am an imaginary line that a sphere rotates around.

Rotation

I am when an object makes a complete spin on its axis.

Orbit

I am the path one object takes as it revolves around another object in space.

Revolution

I am making a complete turn or orbit around an axis or center.

Crater

I am bowl shaped indents or cavities on the surface of a planet, moon, or asteroid that are caused by a collision with another object, such as a meteorite.
