The natural surroundings where a living organism lives is called its Habitat. Habitat provides an organism with everything it needs to survive food, shelter and proper climatic conditions.

A collage of four images representing different habitats: a pond, a forest, a desert, and a river. Each image is labeled with its respective name: POND, FOREST, DESERT, and RIVER.

**CLUE:** I got these characteristics from my parents.

Answer: **INHERITED TRAIT**

**CLUE:** I was not born with this ability but I now know how to do it.

Answer: **LEARNED BEHAVIOR**

**CLUE:** I am all grown up.

Answer: **ADULT**

**CLUE:** I am the first stage in a cycle of metamorphosis.

Answer: **EGG**

**CLUE:** I am a cycle that has four stages.

Answer: **COMPLETE METAMORPHOSIS**

**CLUE:** I am a cycle that has three stages.

Answer: **INCOMPLETE METAMORPHOSIS**

**CLUE:** I am the second stage in complete metamorphosis.

Answer: **LARVA**

**CLUE:** I am the third stage in complete metamorphosis.

Answer: **PUPA**
